CATALOGO DE LA COLECCION DE HONGOS DE ROLF SINGER

ELIZABETH BARRERA (*)

Las colecciones científicas, principalmente cuando ellas incluyen ejemplares que han servido para describir especies nuevas para la ciencia, son fuente obligada de consulta para los especialistas. Este es el caso de la colección de hongos chilenos formada por el micólogo alemán Rolf Singer y algunos colaboradores que se conserva en la Sección Botánica del Museo Nacional de Historia Natural. Está compuesta por 565 ejemplares que corresponden a 353 especies distribuidas en 102 géneros y 22 familias. Del total de ejemplares que integran esta colección, 103 son ejemplares tipo.

El presente catálogo tiene como objetivos principales, entregar en forma ordenada los datos de recolección de cada uno de los ejemplares, dar a conocer los ejemplares tipo que forman parte de la colección y comunicar a la comunidad científica que este valioso material se encuentra depositado y conservado en el Museo Nacional de Historia Natural de Santiago de Chile. Nuestra intención es aportar una herramienta de trabajo a los estudiosos de este grupo de vegetales, quienes constantemente están haciendo consultas respecto a la existencia en nuestras colecciones del material que les permita hacer comparaciones o definir situaciones problemáticas.

(*) Museo Nacional de Historia Natural - Casilla 787 - Santiago de Chile.

Las familias están ordenadas de acuerdo con SINGER (1969), Mycoflora Australis (Beih. Nova Hedwigia 29:405 pp.), los géneros numerados en forma correlativa y ordenados alfabéticamente dentro de cada familia, lo mismo que sus especies. Cada especie lleva el número correspondiente a la colección del Museo (SGO) y debajo de él la palabra TIPO cuando corresponde.

Se incluye un índice genérico (Anexo 1) en el que se indica el número de orden dentro del catálogo y el de la página en que aparece. En el Anexo 2 se entrega un cuadro en el que se relacionan algunos ejemplares citados por SINGER (1969) que aparecen con distinta nominación de la que tienen en las etiquetas originales.
